Georgia Health Policy Center (GHPC) is founded as the research arm of the Georgia Coalition for Health, comprised of representatives of consumers, providers, business, and government.

The GHPC moves from the College of Health and Human Sciences to the Andrew Young School of Policy Studies at Georgia State University.

GHPC serves as the administrative arm of the Philanthropic Collaborative for a Healthy Georgia. Later, becoming the administrative home to Georgia Health Decisions and Communities Joined in Action.

GHPC studies Medicaid Reform at the request of Governor Zell Miller and delivers the study “Directions for Change” to the Georgia General Assembly. Our evaluation work in the areas of long-term care, rural health, and child health is launched.

GHPC informs the design of Georgia’s first SCHIP, PeachCare for Kids, and continues the annual evaluation and outreach efforts.

Dr. Karen Minyard becomes director of the GHPC.

GHPC learns from first-hand experience in Georgia and applies insights nationally to help rural communities in more than 37 states develop relevant and viable health systems—GHPC’s signature style of technical assistance is born.

The GHPC moves from the College of Health and Human Sciences to the Andrew Young School of Policy Studies at Georgia State University.

GHPC informs the design of Georgia’s first SCHIP, PeachCare for Kids, and continues the annual evaluation and outreach efforts.

Dr. Karen Minyard becomes director of the GHPC.

GHPC conducts an assessment of Georgia’s public health system to define public health’s “core business” leading to continued work with state public health on strategic and sustainability planning around rural health, men’s health, asthma, cancer, physical activity and nutrition, tobacco, cardiovascular health, and more.

GHPC convenes more than 800 Georgians at the Summit for a Healthy Georgia to identify health priorities for the state, launching our signature style of meeting facilitation and design.

The Affordable Care Act passes and the GHPC continues earlier work in health care reform with a series of policy briefs, work with state agencies and other states, presentations, toolkits and the commemoration of our 15th anniversary with Health Reform: From Insights to Strategies, A Variety of Perspectives.
