

New Virtual Training: STD Program Evaluation Tools and Training

NNPHI collaborated with Texas Health Institute, the National Coalition of STD Directors, Cardea Services, and the Centers for Disease Control and Prevention to develop STD Program Evaluation Tools and Trainings (STD PETT), a collection of six online training modules and 21 downloadable resources providing step-by-step guidance to enhance STD program evaluation capacity.

STD PETT emphasizes practical, resource-friendly methods and features real-world successes from 7 different local and state STD programs across the nation. With logic model templates, data analysis tutorials, and checklists for every phase of evaluation, STD PETT aims to make evaluation an accessible core activity among STD programs of any size and scope.

This resource was produced by the National Network of Public Health Institutes, Public Health Learning Network, Texas Health Institute, the National Coalition of STD Directors, and Cardea Services, through Cooperative Agreement CDC-RFA-OT13-1302 with the Centers for Disease Control and Prevention (CDC – 5U38OT000203). Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention.
