Objective

NNPHI seeks a contractor to complete evaluation and analysis activities related to two foundational public health training plans designed for both Public Health AmeriCorps members and a general audience. The evaluation activities will seek to address questions relating to the training plans' effectiveness, completeness, and perceived usefulness according to both participants as well as national partners.

Background

Mobilizing more than 40 public health institutes throughout 32 states along with ten university-based regional training centers and 40 training affiliates, the National Network of Public Health Institutes (NNPHI) supports national public health system initiatives and strengthens public health institutes to promote multi-sector activities resulting in measurable improvements of public health structures, systems, and outcomes. To learn more about NNPHI, visit www.nnphi.org.

In collaboration with NNPHI, CDC seeks to provide foundational public health training and resources for the continuing influx of new hires and future applicants across the public health workforce. A curriculum was developed for the first incoming cohort of Public Health AmeriCorps members. The curriculum included a curated e-learning training plan, hosted in CDC TRAIN that aligns with the Core Competencies for Public Health Professionals and was adapted for a national public health audience. This project is intended to manage and expand upon these two training plans, keeping them up-to-date, relevant, accurate, supported with additional resources, and easy to navigate with the goal of high-quality learning that will inspire future public health careers.

Scope of Work (SOW)

This RFP aims to establish agreements with an organization (herein referred to as "contractors")

to support evaluation and analysis activities for both training plans referenced above. The general scope of work is to design and execute an evaluation plan and provide recommendations for training updates.
